

Calcium carbonate Ca Co3

Description

Produced by processing natural finest microcrystalline calcium carbonate

In process mixing of high purity selected chalk deposits , our prod characterized with very low oil adsorption.

Physical properties

Brightness	96% Min
Whiteness	97%
Hardness	3 Moh
PH	9 max
Bulk density	According to size
Insoluble in Hcl	0.2% max
Oil Adsorption	According to size
Moisture conten	0.2 % max

Chemical Composition

Caco3	99.3% Min
Cao	55.58%Min
Mg O	0.18 Max
Fe2o3	0.01 Max
Al2o3	0.03 Max
Sio2	0.3 max
L.O.I	43.67

Our users

Oil and gas drilling

Product and product description

Size	D10	D50	D90
Fine	4 – 9 μ	30 – 40 μ	75 – 90 μ
Medium	15 – 20 μ	80 – 120 μ	350 - 450 μ
Coarse	20-30 μ	130 – 170 μ	450 – 550 μ
